

WORKSHOP SERVICE **BASIC TRAINING**

Our customer workshop provides you with full knowledge and control over your systems and equipment. iNOEX service specialists assist you in deriving the maximum benefit from your iNOEX systems. On the one hand through training your employees in operating/configuring technical equipment to deliver maximum performance, on the other hand through a training for your in-house maintenance team on daily operations and product monitoring.

We provide the most efficient competences for the easy and best system operation and how to avoid damage to your systems. Our basic training is designed for 1-5 attendees.

YOUR BENEFITS AT A GLANCE:

- Employees learn how to contribute to plant efficiency and how to improve tried and tested processes
- Knowledge on how to reduce damage, failures and costs
- Employees develop in-house expert skills to be the first contact point for assistance and support
- Maximizes performance, productivity levels and profits
- Extends lifetime of the equipment
- Reduces the risk of accidents
- Optimization of output and earnings through higher machine availability
- Promotion and training for your own employees

WORKSHOP CONTENTS iNOEX BASIC:

Our service specialists provide you with theoretical and practical knowledge in the following areas relating to the operation of your systems:

- Basic knowledge on measurement and control
- Security settings
- Essential information and correlations on control mechanisms
- Extended operation, trends configuration etc.
- Easy troubleshooting
- Plant calibration
- Regular maintenance

On demand our standard training workshops can be custom-tailored to our needs. Training materials will be in English language.
